-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/1/2010 has been entered.

1. Applicants arguments and amendments filed on 2/1/2010 have been entered.
2. Claim 5 has been amended.
3. In view of Applicants arguments and amendments to claim 5, the previous 35 102(e) rejection is withdrawn. However, a new 35 USC 102(e) you made a 102 rejection is set forth below to address the new claim limitation recited in part e.
4. Claim 5 is examined in the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 5 is rejected under 35 U.S.C. 102(e) as being anticipated by Splawski et al. (U.S. Patent 6,787,309 B2, filed on 4/24/2001).

Claim 5 is drawn to an isolated nucleic acid encoding a polypeptide having at least 95% amino acid sequence identity with a polypeptide selected from the group consisting of: a number of fragments of CatSper protein including at least 4 consecutive amino acids of a CatSper 3 protein.

Splawski et al. teach in SEQ ID NO: 3, twelve consecutive nucleotide sequences that correspond to twelve consecutive nucleotide sequences in SEQ ID NO: 1 of the instant application. These nucleotide sequences in SEQ ID NO: 1 (CatSper3) are GGCTGGAACATC, corresponding to positions 463-474. In SEQ ID NO: 3 of Splawski, these sequences correspond to positions 2338-2349. Accordingly, these twelve consecutive nucleotide sequences will equate to four consecutive amino acids.

Thus the cited art clearly anticipates the claimed invention.

Conclusion

No claims are allowed.
